PROFESSIONAL WORK

Senior Research Fellow, University of Exeter, 2024-

Postdoctoral Research Fellow, University of Exeter, 2020-2023

Awarded two STFC grants

- Creation of software pipeline for cross-matching external photometric catalogues to LSST datasets as part of LSST:UK consortium
- Analysis of preliminary LSST datasets to ensure statistical robustness and correct for potential effects in datasets for scientific application
- Working within the Vera C. Rubin Observatory commissioning team on verifying and validating telescope astrometry, and ensuring that astrometric uncertainties produced by the LSST pipeline match observations

Postdoctoral Researcher, Space Telescope Science Institute, 2018-2019

STScI Director's Discretionary Research Fund

- Analysis and optimisation of supernovae survey for future *Roman* Space Telescope observing strategies
- Involved solving maximisation problem of information content analysis, and robust statistical analysis of the fitting and modelling of supernovae lightcurves
- Software development for `photutils`, an `astropy`-affiliated python package, focussing on analysis tools for PSF photometry
- Analysis of *Hubble* images for supernovae as part of the BUFFALO treasury program

EDUCATION

PhD in Physics, University of Exeter, 2013-2018 — Supervisor: Prof. Tim Naylor

Awarded STFC PhD Studentship

- Explored the effects of blended stars on the astrometric and photometric properties of stars in crowded Galactic fields
- Characterisation of photometric catalogues by angular resolution and survey completeness explored, allowing for quantitative comparisons of the crowding suffered
- Analysed the effect crowding has on the *WISE* catalogue

Master's Dissertation, University of Exeter, 2012-2013 — Supervisor: Prof. Tim Naylor

- Analysis of young stellar cluster ages using the radiative-convective gap as a distance and extinction independent variable
- Analysis of the initial mass function, exploring effects of age/distance on masses in stellar clusters
- Characterised the effect the choice of magnitudes used in a colour-colour diagram has on the interstellar extinction-age dependency, determining the optimal CCD for age independent extinction derivations for low mass young pre-main-sequence stars

College Summer Internship, University of Exeter, 2012 — Supervisor: Dr Jennifer Hatchell

Awarded University College Studentship

- Work on the construction of temperature and dust β maps from JCMT 450 μ m and 850 μ m observations, supplemented with *Herschel* data, and analysis of NGC1333

MPhys in Physics with Astrophysics, First Class Honours, University of Exeter, 2009-2013

SOFTWARE ENGINEERING

Developer for the `astropy photutils` package

- 8th highest contribution (2nd highest 2018-2020) to the community-driven, open source software
- Code tests and feature improvements, package maintenance and distribution, and documentation development

Lead developer of the `macauff` python package

- Development of computationally efficient and precise codebase to ensure accurate photometry and astrometry can be obtained for a set of cross-matched photometric catalogues
- Writing entire project end-to-end, including creation of continuous integration suite, documentation, and class-based python and fortran code

Other project highlights:

- Code for simulations of *Roman* Space Telescope supernovae lightcurves and characterisation efficiency
- Improvements to data reduction for JCMT observations, and writing of key data analysis pipeline

Main programming strengths: python (`astropy`), fortran (`openmp`), statistical analysis and application

GRANTS AND AWARDS	2023, LINCC Frameworks Incubator Program, “Integrating Robust Cross-Matching from the LSST:UK into the LINCC Framework”, \$20,000 2023-2027, Co-PI STFC Grant, “UK Involvement in LSST: Phase C (Exeter Component)”, £510,000 2022, “Above and Beyond” Award, University of Exeter – extending second-year astrophysics lab experiments and converting from IRAF to Python 2019-2023, Co-writer and lead researcher STFC Grant, “UK Involvement in LSST: Phase B (Exeter Component)”, £440,000

SCIENTIFIC TALKS & CONFERENCES	10 seminars, 12 invited & 26 contributed conference talks, 5 contributed conference posters. July 2026, Rubin Community Workshop 2026, Contributed Talk April 2026, LSST:UK All-Hands Meeting, Contributed Talk

April 2026, LSST:UK All-Hands Meeting, Junior Associates Network, Invited Talk
 April 2026, LSST:UK All-Hands Meeting, SMWLVS & ISSC, Invited Talk
 February 2026, SMWLVS Solar Neighborhood Working Group, Invited Talk
 July 2025, ADASSx 2025, Invited Talk
 July 2025, Rubin Community Workshop 2025, Image Quality, Contributed Talk
 July 2025, Rubin Community Workshop 2025, IKCs and IDACs, Invited Talk
 October 2024, SMWLVS Science Collaboration, Invited Talk
 October 2024, Southampton, Seminar
 September 2024, LSST@Europe6, Contributed Talk
 July 2024, Rubin Community Workshop 2024, LSST Science Collaborations Plenary, Invited Talk
 July 2024, Rubin Community Workshop 2024, Stellar Science and Crowded Fields, Contributed Talk
 July 2024, National Astronomy Meeting 2024, Invited Talk
 March 2024, LINCC Tech Talk Series, Invited Talk
 January 2024, Rubin Solar Neighborhood Ultracool Dwarfs Meeting, Contributed Talk
 October 2023, LSST@Europe 5, Contributed Talk
 August 2023, Rubin Project and Community Workshop 2023, Contributed Talk
 July 2023, National Astronomy Meeting 2023, UK Involvement in LSST, Contributed Talk
 July 2023, National Astronomy Meeting 2023, 10 years after Herschel, Contributed Talk
 July 2023, National Astronomy Meeting 2023, Euclid exploitation in the UK, Contributed Talk
 March 2023, 3rd TVS Software Workshop, Invited Talk
 October 2022, LSST@Europe4, Contributed Talk
 July 2022, National Astronomy Meeting 2022, Contributed Talk
 July 2022, Cool Stars 21, Contributed Poster
 June 2022, Asteroseismology MW-Gaia Workshop, Contributed Talk
 June 2022, Bristol-Cardiff Joint Seminar Series, Seminar
 May 2022, Carnegie EPL, Seminar
 February 2022, University of Delaware, Seminar
 August 2021, Rubin Observatory Project and Community Workshop, Contributed Talk
 July 2021, National Astronomy Meeting 2021, Contributed Talk
 July 2021, National Astronomy Meeting 2021, Invited Talk
 June 2021, Statistical Challenges in Modern Astronomy VII, Contributed Poster
 May 2021, LSST:UK All-Hands Meeting, Invited Talk
 May 2021, LSST:UK All-Hands Meeting, Contributed Talk
 April 2021, UKEXOM 2021, Contributed Talk
 April 2021, University of Exeter, Seminar
 March 2021, Cool Stars 20.5, Contributed Poster
 October 2020, RAS Specialist Meeting: TVS with Rubin Observatory, Contributed Talk
 August 2020, Rubin Observatory Project and Community Workshop, Contributed Talk
 July 2020, University of Exeter, Seminar
 July 2019, Python in Astronomy 19, Contributed Talk
 June 2019, STScI, HotSci@STScI Colloquia, Seminar
 March 2019, STScI, Friday Science Coffee, Seminar
 February 2019, STScI, TESS Data Workshop, Contributed Talk
 February 2019, UNLV BUFFALO 2019 Meeting, Contributed Talk
 May 2018, Exeter, First Year PhD Development Day, Seminar
 March 2018, Science with Precision Astrometry, Contributed Poster
 September 2017, Cardiff Star Formation Workshop, Contributed Talk
 July 2016, NASA Goddard Space Flight Center, Seminar
 June 2016, Cool Stars 19, Contributed Poster
 April 2015, BECSS Bristol, Contributed Talk
 March 2015, Milky Way Astrophysics from Wide-Field Surveys, Contributed Talk

COMMITTEE & SERVICE

July 2026, Rubin Community Workshop 2026, ISSC Session Co-Chair
 July 2026, Rubin Community Workshop 2026, Science Organising Committee
 July 2026, National Astronomy Meeting LSST:UK Junior Associates Network Lunch, Organising Committee Chair
 April 2026, LSST:UK & Euclid Joint Meeting, LSST:UK Science Organising Committee
 August 2023, Rubin Project and Community Workshop 2023 Crowded Fields Session, Science Organising Committee
 May 2021, LSST:UK All-Hands Meeting, Local Organising Committee
 June 2019, Hubble Support Scientist for Cycle 29 Time Allocation Committee

Peer review referee for AAS Journals and JOSS
 Member of LSST Informatics and Statistics Science Collaboration Executive Council, 2026-
 Co-Chair of LSST:UK Junior Associate Network, 2025-
 Co-Chair of LSST Stars, Milky Way and Local Volume Science Collaboration (SMWLVSC), 2025-
 Member of LSST:UK Communications Steering Group, 2025-
 Member of LSST:UK Exec Group, Junior Associate Network Representative, 2024-
 Member of LSST SMWLVSC Crowded Stellar Field Task Force, 2022-
 Member of Vera C. Rubin Observatory SIT-Com Commissioning team (Astrometric and Crowded Field Science Units), 2022-2026

TEACHING & OUTREACH EXPERIENCE

Astrophysics Lab Re-Write Lead, 2021-2025

- Spearhead updating of second year astrophysics lab course content
- Involves translating materials into a modern programming language
- Update pedagogy to ensure that students are engaging with the material in the most effective way
- Review course aims and opportunities for students to practice experimental analysis and programming skills developed in complementary modules

Undergraduate Astrophysics Lab Demonstrator, 2013-2022

- Assist in teaching of 20-30 second year undergraduates in the astrophysics portion of the lab
- Demonstrated use of UNIX commands, IRAF and Python, data reduction and analysis, & report writing
- Duties included report assessment and feedback
- Experiments included analysis of Cepheid variability periods, colour-magnitude diagrams, and optical spectroscopy

Undergraduate Python Demonstrator, 2021

- Teaching Python to approximately 30 second year undergraduates
- Demonstrating key Python and general programming skills, logical thinking, and problem solving
- Includes live assistance, technical support, and formal work marking and feedback

Undergraduate Astrophysics Teaching Telescope Operator, 2013-2017

- Lead undergraduate students in usage of the university's teaching telescope
- Teaching of telescope operation, as well as remote/automated capacities of ACP Scheduler
- Involved teaching an understanding of observation planning

Undergraduate Physics Problem Tutor, 2013-2017

- Assist in running first year undergraduate physics problems classes
- Involved organising homework sessions, managing approximately 140 students
- Provided guidance on a wide variety of problems, ranging from solid state physics to electromagnetism to astrophysics

"Pint of Science" Event Organiser, 2013-2018

- Co-organised the "Pint of Science" outreach events held in Exeter each year
- Events involve three nights of outreach talks from a selection of researchers, aimed at public engagement
- Included a host of responsibilities including deciding the themes for each nights' talks, inviting speakers, and organising event location
- Involved engaging with the community and answering questions from members of the public

Observing At the James Clerk Maxwell Telescope, Hawaii, 2014

- Experience at the JCMT as part of the JPS survey
- Involved telescope operation, data processing, and observation scheduling
